

www.IntraShip.dhl.ru

DHL IntraShip is a web-based shipping tool that's ideal for processing your shipments online. It allows shipments to be easily and quickly arranged by multiple users at the same time – whether they're based at the same location or different sites across the country.

Benefits

- Save time by preparing and managing your shipments online anytime, day or night.
- Quickly prepare waybills and customs documentation online, reducing paperwork and the risk of errors.
- Simplify your booking process further by using advanced features such as shipment and receiver data import.
- A central hub of shipment data ensures all those involved in processing your orders can access the same information simultaneously, and create shipment reports
- No installation required.
- No special training is required but, if you do need help, user guides are available at <http://ecom.dhl.ru> and there's also a dedicated helpline to support you.

System requirements:

- A DHL account
- Internet access
- Printer
- E-mail
- Adobe Reader
